NABAT GROUP (NABAT - Rubber Manufacturer and trade factory). Our organization is manufacturing **EPDM Gaskets** for PVC profiles, Aluminium profiles and Wood Profiles, EPDM injection parts for construction systems from aluminum and various injection materials. NABAT is engaged also in production on the basis of rubber for the automobile and construction industries. The main range for automotive industry rubber gaskets for glasses and the doors makes, many versions of sponge profiles, profiles with an injection, smashes also other injective parts, rubber segments and hoses. Control of quality of the raw materials used in production is carried out according to the most known standards in branch. For this purpose in the order of firm there is completely equipped laboratory. Forms of all products are developed on modern programs and made in department of production of forms. NABAT will help you in development and designing of new sealing profiles according to drawings or samples of the customer. EPDM Gaskets work in the wide range of working temperatures: from -55 to +135 °C, possess low residual deformation, have different degree of hardness, an excellent external surface.

- EPDM Gaskets for PVC systems
- EPDM Gaskets for Aluminium systems
- EPDM Gaskets for Wood systems
- EPDM Gaskets for PVC systems
- EPDM Gaskets for Mosquito systems
- EPDM Gaskets for External surfaces
- TPV, TPE, SBS & Grey Epdm Gaskets

NABAT GROUP (фирма «НАБАТ» - резинопроизводственная промышленность и торговля). Организация занимается производством **EPDM уплотнителей** для ПВХ профилей, Алюминевых профилей и Дерева, инъекционные угловые прокладки для строительных систем из алюминия и различные инъекционные материалы. НАБАТ занимается и производством продукции на базе каучука для автомобильной и строительной промышленности. Основной ассортимент для автомобилестроения составляют резиновые прокладки для стекол и дверей, многие разновидности губковых профилей, профили с инъекцией, громет и прочие инъективные части, резиновые сегменты и шланги. Контроль за качеством сырья, используемого в производстве осуществляется по самым известным стандартам в отрасли. Для этой цели в распоряжении фирмы имеется полностью оснащенная лаборатория. Формы всех продуктов разрабатываются на современных программах и изготавливаются в отделе по изготовлению форм. НАБАТ окажет Вам помощь в разработке новых уплотнительных профилей по чертежам или образцам заказчика с последующим изготовлением продукции на производстве, ЭПДМ Уплотнители работают в широком диапазоне рабочих температур: от -55 до +135°C, обладают низкой остаточной деформацией, имеют разную степень твердости, отличную внешнюю поверхность.

- ЭПДМ Уплотнители для ПВХ конструкций
- ЭПДМ Уплотнители для Алюминевых конструкций
- ЭПДМ Уплотнители для Деревянных конструкций
- ЭПДМ Уплотнители для Москитных систем
- ЭПДМ Уплотнители для Фасадных конструкций
- ТПВ, ТПЕ, СБС, Серый Эпдм
